

Wizard Session Document Generation

Talkin' bout my (doc) generation

Agenda

- **What are the options?**
- **BP Actions**
- **Dude, where's my document?**

What are the options?

Document Generation Options

Create Document

- ✓ Fastest to build
- ✗ Very limited layout

Doc Templates

- ✓ Images + Grids
- ✓ Flexible for most use cases

BIRT

- ✓ Pixel-perfect layouts
- ✗ Most complex

BP Actions

BP Actions — Core Flow

Generate Document:

- Builds the document, allowing updates before review

Review Document:

- User preview, signing & download
- Does not require Generate Document step

Dude, where's my document?

Document Visibility Gotcha

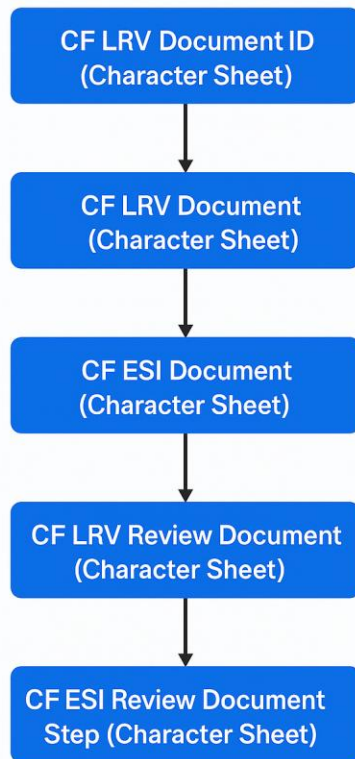

Review Document are NOT stored in Worker Documents.

Fix:

Use an Orchestration + Document ID to attach it.

All the calc fields we need

Calculated Field Hierarchy

Extract the Review Document Event

Calculated Field - Extract Single Instance [CF ESI Review Document Step \(Character Sheet\)](#) ⋮

Field Name CF ESI Review Document Step (Character Sheet)

Business Object [Create Character Sheet Event](#)

Calculation

Additional Info

Where Used

Extract Single Instance

Source Field [📄 Review Document Events](#)

Related Business Object [Review Document Event](#)

Condition [📋 Any is True](#)

Sort Field [📅 Date and Time Completed](#)

Sort Direction (empty)

☐ Ascending (A to Z)

☒ Descending (Z to A)

Instance to be Returned (empty)

☒ First occurrence

☐ Last occurrence

☐ Specific occurrence

Extract the Review Documents

Calculated Field - Lookup Related Value

CF LRV Review Document (Character Sheet) ⋮

Field Name CF LRV Review Document (Character Sheet)

Business Object [Create Character Sheet Event](#)

Calculation

Additional Info

Where Used

Lookup Related Value

Lookup Field [CF ESI Review Document Step \(Character Sheet\)](#)

Related Business Object [Review Document Event](#)

Return Value [Review Documents](#)

Extract the Most Recent Review Document

Calculated Field - Extract Single Instance [CF ESI Document \(Character Sheet\)](#) ⋮

Field Name

CF ESI Document (Character Sheet)

Business Object

[Create Character Sheet Event](#)

Calculation

Additional Info

Where Used

Extract Single Instance

Source Field

[CF LRV Review Document \(Character Sheet\)](#)

Related Business Object

[Review Document](#)

Condition

[Any is True](#)

Sort Field

[Any is True](#)

Sort Direction

(empty)

☒ Ascending (A to Z)

☐ Descending (Z to A)

Instance to be Returned

(empty)

☒ First occurrence

☐ Last occurrence

☐ Specific occurrence

Extract the Generated Document

Calculated Field - Lookup Related Value CF LRV Document (Character Sheet)

Field Name CF LRV Document (Character Sheet)

Business Object [Create Character Sheet Event](#)

Calculation

Additional Info

Where Used

Lookup Related Value

Lookup Field  [CF ESI Document \(Character Sheet\)](#)

Related Business Object [Review Document](#)

Return Value  [Generated Documents and Reports](#)

Extract the Document ID

Calculated Field - Lookup Related Value CF LRV Document ID (Character Sheet)

Field Name CF LRV Document ID (Character Sheet)

Business Object [Create Character Sheet Event](#)

Calculation

Additional Info

Where Used

Lookup Related Value

Lookup Field CF LRV Document (Character Sheet)

Related Business Object [Repository Document \(Abstract\)](#)

Return Value Document ID
