FileUploader

- **Anyone Else Remember Expression Language?**
- **FileName and extension before Save**
- **Huge improvement in User Experience**

```
fileTypes : gif,jpg,jpeg,png ,
"onFileAdd": "<%
fileData.value = json:asJSON(event.row);
imageFileUploader.clearError();
if (string:contains(event.row.fileName, '&')){
    imageFileUploader.setError('That filename is invalid')
}
%>",
"onFileRemove": "<%
imageFileUploader.clearError()
%>"
}

A man and a woman are working together in an office. The man is seated at a desk, looking at a computer monitor and smiling. The woman is standing behind him, also smiling and looking at the screen. The background shows a wall with some charts and a window. The entire image has a light purple overlay.
