

Page Performance Optimization

Beating the World Wide Wait

Jan 20 2026

Optimization Choices

- **Page Load Order**
- **Inbound Data Performance**
- **OnLoad and Scripting**
- **Page Widget Performance**

Page Load Order

Page Load Order

Inbound Data Performance

Data Is Usually The Problem

- Too Much Data
- "How can I show my user 1000 Rows?"
- Push back on usability grounds

Parallel vs serial operations

▼ Queries

▼ Graph Queries

▼ WQL Queries

 getAddress

 getBenefitElections

 getBettina

 getBP

 getPosition

 getSuporg

- Endpoints Assemble!
- Endpoints will mostly go in parallel
- Dependency can cause Sequential processing

Batch Protocol

- Can batch up to 300+ calls
- There is a [KSS on this](#)
- Requires POST
 - Look for GET-POST Switcheroo in [this KSS](#)

Proprietary & Confidential

the
groove

The background of the slide features a photograph of two women in a professional setting, looking at a laptop. The image is covered by a semi-transparent orange filter. The woman on the left has dark curly hair and is wearing a dark top. The woman on the right has short blonde hair, wears glasses, and a light-colored blazer. They are both looking intently at the laptop screen. The text 'OnLoad and Scripting' is centered over the image in a large, white, sans-serif font.

OnLoad and Scripting

Nesting and Other Red Flags

- Most common Memory Exceed is on load
- Nested array functions
- See [this KSS](#)

Page Widget Performance

How To Time a Widget

- Widgets load sequentially
- Use a pageVariable to store a now()

```
%> ,  
"onLoad": "<% const startTime = pageVariables.startTime=date:now() %>"
```

```
{  
  "type": "text",  
  "label": "Load Time (ms)",  
  "enabled": false,  
  "value": "<%  
    date:now().between(pageVariables.startTime , 'MILLISECOND')  
  %>"  
}
```

Proprietary & Confidential

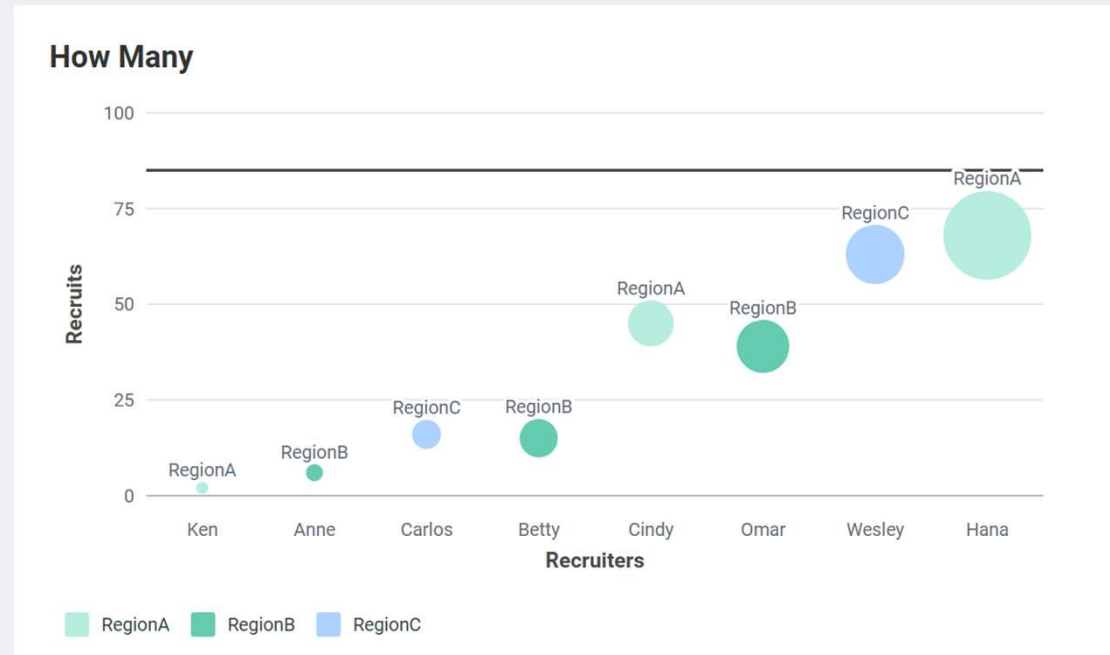

Grids

- Most likely widget to cause failure
- "How can I show my user 1000 Rows?"
- Pagination
 - Automated
 - Manual
- View vs Edit

Images, Charts, and Other Myths

- All slower than raw text, but not bad
- Embedded Images render fast, but feel laggy
- Chart Cards lazy load
- Charts will mostly lazy load
- Attachments will mostly lazy load

Thank you.
