

# The Proposal

I sent a BP to Ryan Reynolds, he denied

# BP Design Pattern Choices

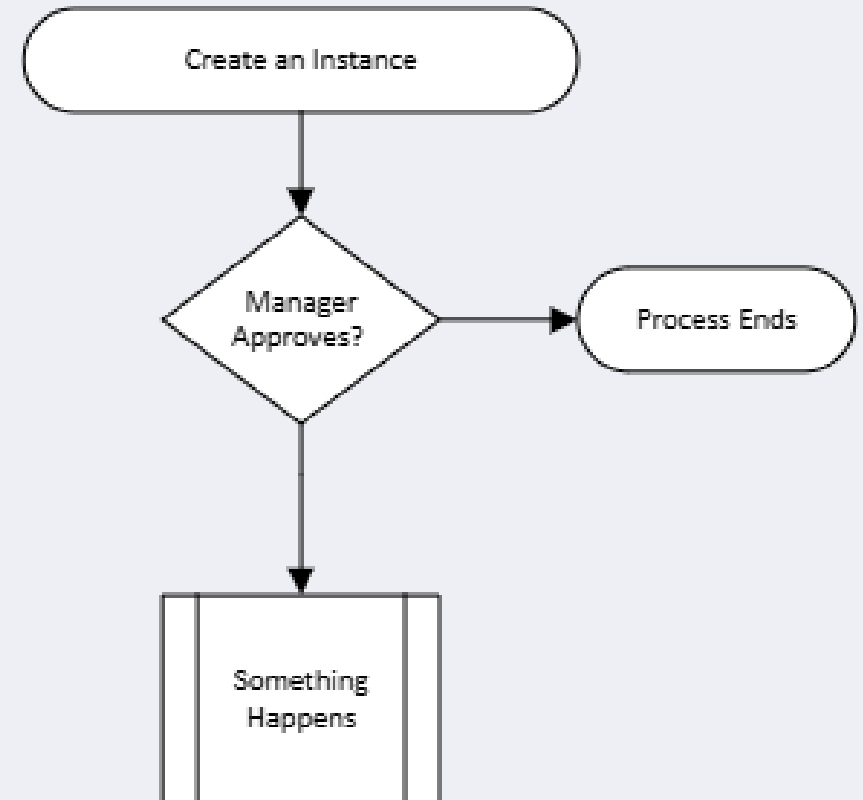

- **Simple BP**
- **Status Code Pattern**
- **Current/Proposed**

# Keepin' It Simple

## Easy To Set Up and Use

- **Create An Object**
- **Create a BP against it**
- **Often “Good Enough”**

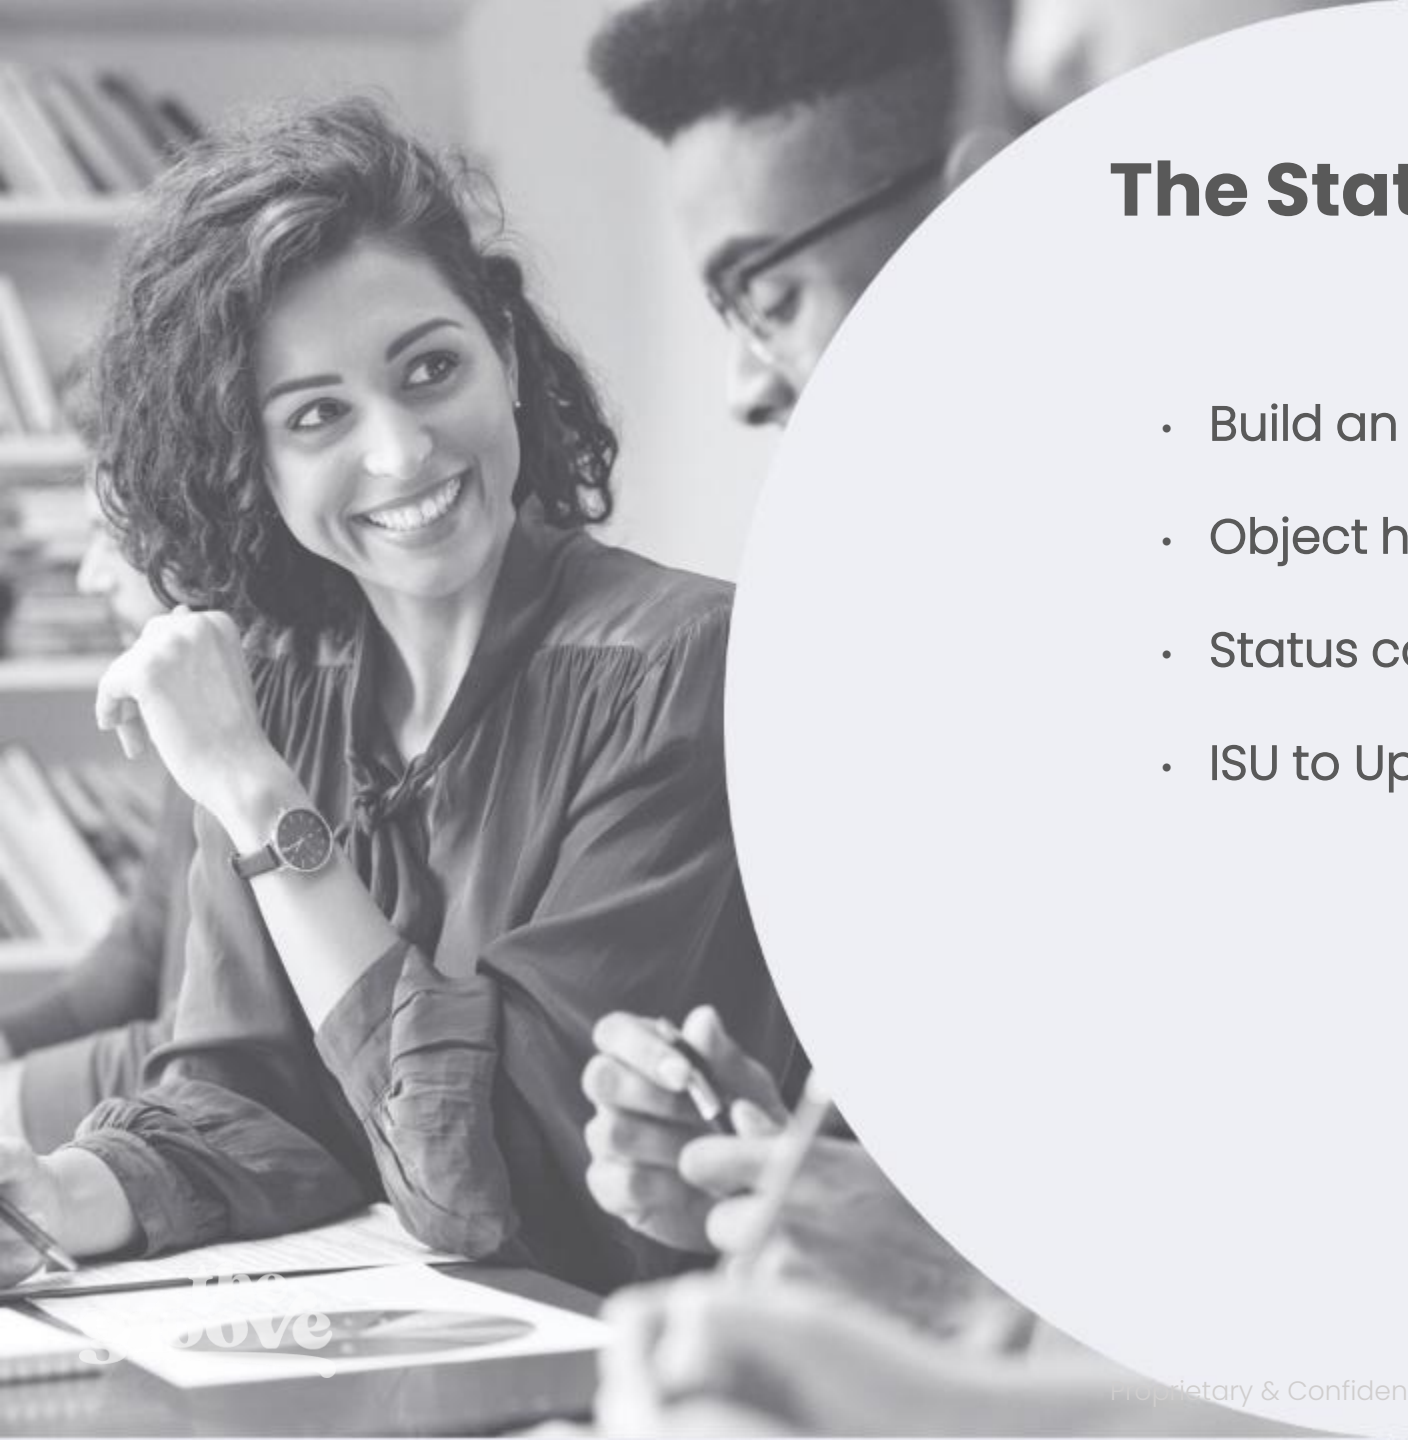

## But There Are Some Troubles

- **Ongoing Changes**
- **Update After Approve**
- **Audit works**

# Status Codes

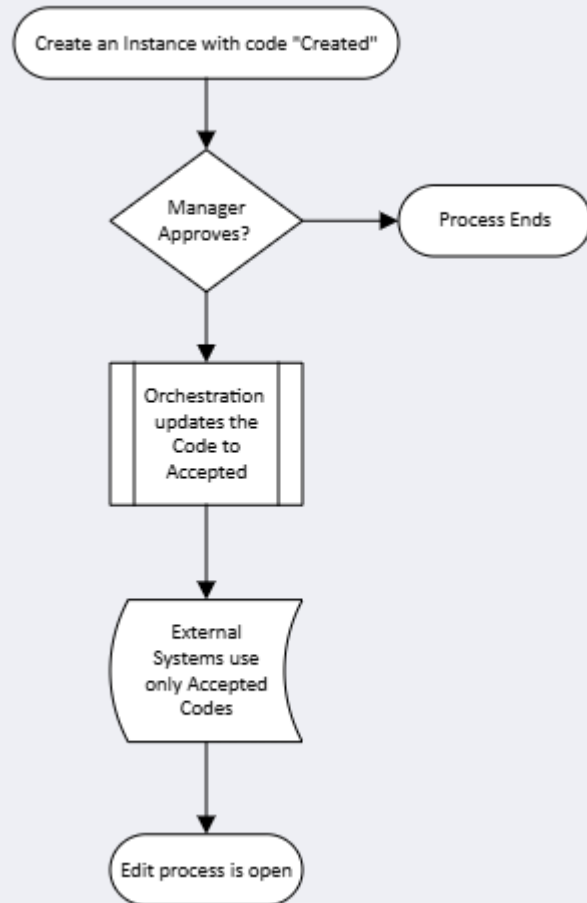

A black and white photograph of a woman with curly hair, smiling and looking towards the camera. She is wearing a dark, long-sleeved top and a watch on her left wrist. She is sitting at a table with papers and a pen. In the background, a man with glasses is partially visible, looking down at something on the table. The image is partially obscured by a large white circle on the right side, which contains the text.

# The Status Code Pattern

- Build an object with a status code
- Object has simple permissions
- Status code has separate permissions
- ISU to Update the Code only

# Already Covered in Depth

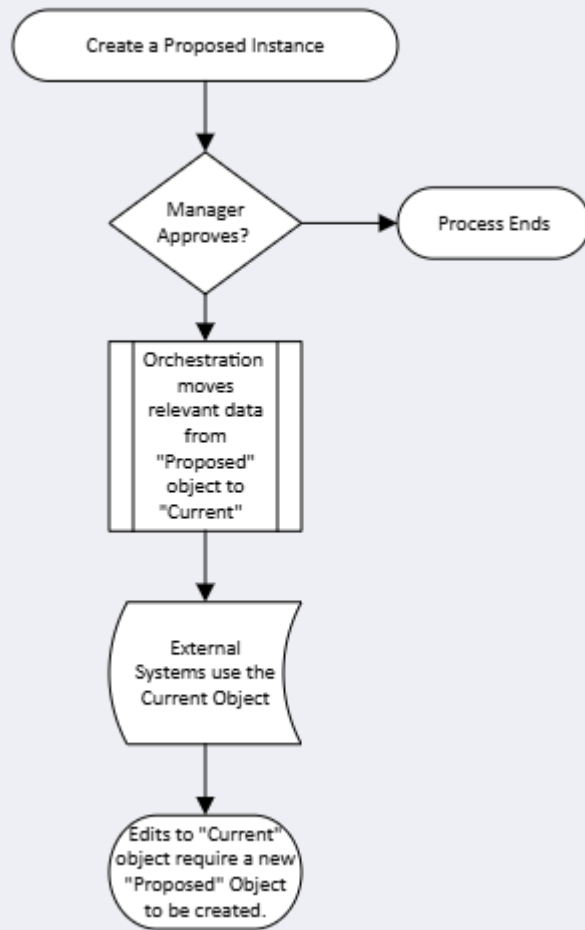

- **Look at the BP KSS from 2024**
- **Fails are not as safe**
- **More instances in the object**

# Current/Proposed

# Current – Proposed Architecture

- **Build a Current Object**
- **Build a Proposed Object**
- **Proposed Object has simple permissions**
- **Current Object is ISU driven**
- **Modifications**

# Security Setup

- **Current Object**
  - **Everyone Gets View**
  - **ISU gets Modify**
- **Proposed Object**
  - **Everyone gets Modify**
- **Be careful of Context**
- **Keep ISU access close**
